JAHNA PATRICIA POTICAR

IT INFRASTRUCTURE & SECURITY SUPPORT | REMOTE MSP SUPPORT

Cebu City, Philippines | +63 977 372 3662 | jahnapatricia@gmail.com

PROFESSIONAL SUMMARY

IT Support Engineer with 3+ years of combined IT support and system administration experience in managed services and client environments. Supported users across the United States, United Kingdom, Australia, and the Philippines. Experienced in Windows PC, MacOS and laptop troubleshooting, printers and peripherals, network connectivity, Microsoft 365 and Google workspace administration. Account access, and user support. Skilled in Freshdesk ticket management and SyncroMSP remote support, with approximately 90% SLA performance. Known for clear customer communication, systematic troubleshooting, and detailed knowledge-base documentation.

TECHNICAL SKILLS

MSP Service Desk: Level 1/2 troubleshooting, ticket triage and ownership, SLA management, Freshdesk, SyncroMSP RMM, customer updates, vendor escalation, documentation.

Microsoft & User Onboarding: Microsoft 365, Exchange Online, Outlook, Teams, OneDrive, SharePoint, Entra ID, Active Directory, user provisioning, permissions, MFA, Conditional Access, Intune.

Hardware & Infrastructure: Windows 10/11, laptops/desktops, printers, peripherals, servers, Synology NAS, storage, cabling, Ubiquiti, Cisco, TP-Link switches and routers, wireless access points, CCTV.

Networking & Security: TCP/IP, DNS, DHCP, Wi-Fi, VPN/OpenVPN, Fortinet and Clavister firewalls, remote access troubleshooting, Huntress detection review, endpoint security fundamentals, ISP coordination.

Other Platforms: Google Workspace, 3CX/Yeastar VoIP, cPanel, technical knowledge bases; familiarity with Git/GitHub, Notion and ClickUp.

PROFESSIONAL EXPERIENCE

CloudConsole IT Services Inc. | IT Support Engineer | June 2023 – December 2025

- Delivered remote and onsite technical support across multiple international MSP client environments, diagnosing hardware, operating system, software, connectivity and infrastructure issues.
- Administered Microsoft 365, Entra ID and Google Workspace; resolved access, MFA, licensing, Outlook and collaboration-tool issues.
- Supported network deployments, routing/switching, wireless connectivity, VPN/firewall troubleshooting, server infrastructure and Synology NAS solutions.
- Used Freshdesk for ticket tracking and SyncroMSP for remote support and monitoring; maintained approximately 90% SLA performance.
- Supported security monitoring using Huntress and assisted with endpoint and access-related troubleshooting.
- Coordinated with project managers, senior technical teams and vendors on infrastructure implementations and escalations; independently supported client sites in Cebu and parts of the Visayas.
- Created knowledge base documentation for recurring Adobe access, VPN and user provisioning issues.

Excelect Industrial and Technical Services | IT Administrator / Web Developer | May 2020 – October 2023

- Managed business email through cPanel; configured office systems and networks; troubleshot hardware and software issues.
- Designed and maintained the company website and improved office network topology.

Bellavous Salon & Day Spa | Contract IT Administrator | March 2022 – June 2023

- Maintained and monitored multi-branch CCTV systems, troubleshooting reliability and access issues.

Bianos Pizza | IT Administrator (Contract) | August 2021 – April 2023

- Supported computer and network configuration, CCTV deployment and maintenance, and secure home-office setups.

ACADEMIC PROJECTS

COVID-19 Monitoring Website | University of San Carlos

- Used Playwright to automate browser interactions and test website functionality, including interface workflows.
- Applied software testing practices from the Computer Engineering curriculum; also used pytest for automated testing in programming projects.
- Used Git and GitHub for academic and personal source-code version control.

System Design and Implementation of Functional Electrical Stimulation based Finger Flexion Assistive Device | University of San Carlos

- Selected for presentation at a research conference organized by the Institute of Computer Engineers of the Philippines (ICpEP).
- Received a Certificate of Appreciation for the research paper during the 1st International Research Conference on Computer Engineering and Technology Education.
- Research paper selected for the International Journal of Computing Science Research.
- Contributed to research involving the design and implementation of a functional electrical stimulation (FES)-based assistive device for finger flexion for monoplegia patients.
- Demonstrated technical research, engineering design, problem-solving, and interdisciplinary collaboration skills.

EDUCATION & PROFESSIONAL DEVELOPMENT

- Bachelor of Science in Computer Engineering — University of San Carlos
- Cisco Networking Academy: Networking Basics; Networking Devices and Initial Configuration; Introduction to Cybersecurity; Cisco Certified Support Technician (in progress).
- Additional: PCEP Certified Entry-Level Python Programmer; Google Foundations of Project Management; CS50 Web Programming with Python and JavaScript (in progress).
